Professional Summary

Results-driven MERN Stack Developer with a deep foundation in full-stack JavaScript, component-based UI architecture, and NoSQL database design. Proven analytical and computational problem-solving capabilities demonstrated by solving over **250+ core algorithmic challenges on LeetCode**. Hands-on experience architecting high-performance RESTful APIs with **Node.js and Express**, building interactive and responsive frontends utilizing **React.js**, and structuring scalable document schemas in **MongoDB** to deliver robust, production-ready web applications.

Technical Skills

Programming Languages: JavaScript (ES6+), HTML5/CSS3, SQL
Frontend Technologies: React.js, Redux, Tailwind CSS, Responsive Web Design
Backend & APIs: Node.js, Express.js, RESTful APIs, JSON Web Tokens (JWT), Postman API Client
Databases & Storage: MongoDB, MySQL
Core Computer Science: Object-Oriented Programming, Data Structures & Algorithms, DBMS
Tools & Version Control: Git, GitHub, VS Code, npm/Yarn

Software Engineering Projects

Full-Stack E-Commerce Platform | *MongoDB, Express.js, React.js, Node.js, Redux*

- Engineered a comprehensive, full-stack e-commerce application featuring dynamic product catalogs, real-time shopping cart functionality, and user order management using the MERN stack.
- Built interactive, reusable frontend UI components with React.js and managed global application state efficiently using Redux, minimizing unnecessary DOM re-renders.
- Developed scalable Express.js REST API routes and utilized complex MongoDB aggregation pipelines for rapid category filtering, pagination, and product search operations.
- Integrated stateless JWT authentication within Node.js middleware to secure user sessions, encrypt passwords with Bcrypt, and protect sensitive profile and checkout routing.

Online Examination Management Portal | *React.js, Node.js, Express.js, MongoDB*

- Developed the end-to-end architecture for an automated online examination system, enabling dynamic test creation for administrators and real-time result processing for students.
- Designed and implemented flexible NoSQL document schemas in MongoDB to accurately map data associations between independent users, multi-tiered question sets, and active test instances.
- Created a responsive and accessible frontend interface utilizing React.js, ensuring a seamless and distraction-free test-taking experience across different device viewports.
- Exposed documented REST endpoints optimized for rapid data lookups, ensuring reliable JSON payload rendering and high frontend connectivity speeds.

Secure Authentication Microservice | *Node.js, Express.js, JWT, Bcrypt*

- Architected a scalable, standalone Express.js authentication service decoupled from core business logic to support microservice-based application integration topologies.
- Enforced industry-standard security layers by integrating secure password hashing techniques through Bcrypt to safeguard database storage blocks against credential-stuffing attacks.
- Formulated systematic API input verification protocols using Express middleware to clean inbound server requests, mitigating vulnerabilities associated with cross-site scripting (XSS).
- Conducted detailed backend interface verification using complex assertion suites in Postman to monitor response latencies, body data integrity, and HTTP state outputs.

Education & Core Coursework

Bachelor of Technology in Computer Science

GLA University

2022 – Present

Mathura, India

Relevant Academic Coursework: Data Structures & Algorithmic Optimization, Database Management Systems (DBMS), Advanced Object-Oriented Analysis & Design, Computer Networks, Operating Systems, Software Engineering Methodologies

Technical Competitions & Certifications

Algorithmic Mastery (LeetCode Platform): Successfully engineered optimal solutions for over **250+ technical challenges** spanning Arrays, Strings, Linked Lists, Queues, Stacks, Trees, and Dynamic Programming principles.

Full-Stack Web Development Certification (2024): Finished comprehensive training focusing on modern JavaScript frameworks, client-server models, and REST API architectural patterns.

NETCAMP Technology Certification: Awarded professional credential validating understanding of underlying network configurations and system security protocols.
